

# Police Patrol Wagon Suspect, Prisoner & Inmate in-Custody Transport Safety Camera System

When the accounts, testimony and sworn statements of law enforcement officers, is not sufficient evidence to explain situations, events or actions by others leading up to a response by law enforcement officers that they deemed appropriate, the value of high resolution video evidence can help others see what the officers were faced with, what actually occurred and how it was dealt with in a professional non-biased digital expert witness that is incapable of any prejudice, bias or socio-economic or political agenda.

Violations of law, acts of violence, deceit, process and procedure, will be captured without regard to whom is perpetrating the act in a police prisoner transport wagon or van. This means those who perform their duties, in a professional manor will have the support of a digital eye backing them up as an expert witness.

Digital video evidence provided by Police Patrol Wagon Prisoner & Inmate in-Custody Safety Camera Systems provide a sequential, non-biased, impartial expert witness account of the in-vehicle treatment, condition of the detainee, arrest suspect prisoner or inmate transportation from location to location in the police prisoner van. This information can be downloaded to a PC, archived and stored in case future claims are made, charges filed or other questions regarding the transport process need to be reviewed.

Use of digital mobile video recording systems for police prisoner & inmate in-custody transportation wagons or van safety, can be a reasonable response to the high risk suspect arrest, prisoner in custody police transportation process now facing many law enforcement agencies.

When there are tough questions and high-risk liability, Detainees, Arrest Suspects, Prisoner & Inmate in-Custody Safety Camera Systems mounted in Police Vans or Police Patrol Wagons can provide digital backup in the form of expert witness of actions and events without bias, prejudice or political agenda.

## Objectives of Police Prisoner Custody Transport Surveillance Camera Security Solutions:

- Provide Expert Witness of actions and events without bias, prejudice or political agenda
- Document all interaction between officers and prisoners while in police custody vehicle
- Record all interaction or events Video in Full High Definition 1080p (1920x1080 TV lines)
- Record all interaction or events Audio from all camera inside vehicle
- Document transport drive via G-sensor for crash, hard braking, dangerous turns
- Document transport drive via GPS with location, speed and synchronized On Screen Mapping
- Provide metal Security Cages for metal vandal-resistant HD 1080p cameras
- Redundant Looping video memory in case of; crash, assault on officer, DVR memory failure
- Vehicle Evidence Fire Vault can protect Alarm files or recent memory in case of vehicle fire
- Built in Wi-Fi module on FHD4W for automated Data Download at station
