VEFV Key Features:

- Redundant Recycling Video Memory
- Built in 32GB Memory Backup
- Full HD 1080p High Definition or D1 resolution
- Rated 1500 degrees F @ 15+ minutes
- Metal Vandal Resistant Casing
- Professional Aviation connection
- Sync Recording or Alarm recording
- Steel Hardware Non-Corrosive Bracket
- Field Upgradable Option

Vehicle Evidence Fire Vault (“VEFV”) option for Aviation Connector equipped; SD8G, SD8W, SD8C, FHD4G, FHD4W & FHD4C

The VEFV provides a redundant looping memory of 32GB that can be used in case of primary SSD or HDD failure when the vehicle suffers a catastrophic event like a vehicle accident, vehicle impact, civil riot assault or vehicle fire where the primary SSD or HDD has been damaged due to high “G” force inertia or in case of a fire high heat.

The metal casing combined with the high resistance to heat may provide valuable video evidence when the primary DVR has been damaged, stolen or burned in cases of criminal civil riots, assaults on private property or on law enforcement vehicles.

| Device Parameters | Device Parameters |
|----------------------|-----------------------------------|
| SDHC Memory | Built-in 32GB SD card |
| Recycle Record | Yes |
| SD Card Recycle life | 100,000 recycles expected life |
| Standing temperature | ≤1000 |
| Standing time | 15-20minutes |
| Shell material | Metal |
| Record Mode | Sync recording or Alarm recording |
| Connector | USB 2.0 Aviation connector 5.0V |
| Working Voltage | 5.0V |
| Length of Cable | 30CM |
| Size | 142mm(L) x 91mm(W) x 72mm(H) |
| Weight | 0.975Kg |
